| <b>Changes</b>           | <ul style="list-style-type: none"> <li>Product label structure has been updated to provide our manufacturing facility a higher granularity of version control, on product sub-assemblies. This upgrade is aligned with the introduction of a new SAP system at our factory.</li> <li>Hardware sub-assembly version control has been disambiguated from the overall unit assembly number (hardware + firmware build), facilitating greater overall version control.</li> </ul> |                       |                 |                       |

## IMPROVEMENTS

New label

## NOTES ABOUT THIS UPDATE

- This PUN is relating to product label changes only
- H/W: Independent hardware version number
- F/W: Independent firmware version number
- ASY: Internal factory assembly code
- Firmware versions loaded are now more easily distinguishable
- Internal factory work-order number has been added (in new label example above – “(3657)”)
